

## The online advent calendar is about to begin... 24 days of digital distractions counting you down to the holidays

**Electric December 2006** is a digital advent calendar presented by Watershed in Bristol, which goes live on Fri 1 Dec – offering a unique digital present each day during the run-up to the festive season. A selection box of short films, games, animations and music can be discovered at [www.electricdecember.org](http://www.electricdecember.org) helping you count down the days to Christmas.

Topical issues that have dominated the headlines on a national and local level this year include, amongst others, climate change, the war in Iraq, gun and knife crime and the forthcoming anniversary of the abolition of the slave trade. With these headlines in mind, this year's contributors were asked to interpret the theme of **Wishing** and showcase what Bristolians wish for Christmas, the city and for the future. The resulting multi-media distractions are a gift from Bristol and reflect the digital creativity and talent resident in the city.

Details of this year's presents are listed overleaf, highlights include a mystical 'Wishing Machine', where you can select your very own 'wish cycle', the chance to design the Super Hero you always wished you could be, a film that wishes lives were not lost to knives and the 'Wish Library' a magical place where you can borrow a little festive cheer.

**Electric December** projects the creativity and innovation of local groups, businesses, artists and learning organisations to the world. Each year local community and education groups are partnered with professional media companies to create new creative content for the web. These partnerships demonstrate that the **Connecting Bristol** momentum, which ensures that skills are pooled and shared and the world of creativity on the Internet is revealed, explored and discussed is thriving throughout the city.

**Electric December 2006** is also an example of the work contributing to Bristol's bid to The Digital Challenge, which offers a £7m prize to develop a showcase zone for ICT innovation. The wide range of participants reflect the active commitment of Bristolians to share and build an inclusive city.

Watershed's Managing Director, Dick Penny, says of the project: 'Electric December is a platform which showcases Bristol's creativity, presenting 24 fun and interactive digital gifts to the World. Each year the increasingly pervasive nature of digital communication makes this collaborative project ever more relevant and exciting, with new talent sharing fresh ideas with an increasingly inter-connected community'.
